

Find Out How You Can Insulate Your Home For **FREE!**¹

Courtesy energystar.gov

Examples of how your home wastes energy all year round.

Fact: Improper insulation and air sealing can cause your heating & cooling systems to work less efficiently and cost you hundreds of dollars per year.

When you add up all the hidden leaks in a typical home in your neighbourhood, they would equal a hole the size of an open window; one that is open all year round. Upgrading your insulation and air sealing with EnWise can save you up to **\$400** on annual heating & cooling costs, and up to **1 tonne** of GHG emissions per year.

Our health and wellbeing is important to all of us. An improperly insulated home can expose your family to potential health risks that are caused by mould from excess moisture or poor indoor air quality. Our Insulation Specialists will assess your home for common problem areas and provide affordable ways to improve its efficiency and comfort. By making these improvements and others, you'll be eligible for up to **\$10,000** in available grants from the government!

Is Your Home In Need Of Upgraded Insulation?

- Your home is 35 years old or greater
- Your home is drafty, with uneven temperatures
- Your furnace and air conditioner seems to run too long
- Your home has dangerous ice build up in your eaves during winter
- Your windows develop excess moisture
- Your home has mould or mildew forming on walls or in the attic
